

Solution Architecture

Date	1 July 2026
Team ID	XXXXXX
Project Name	HouseRent – House Rental Management System
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component

Component	Technology
 Presentation Layer	React.js, HTML5, JavaScript
 API Gateway	Express.js, Node.js
 Authentication Service	JWT, bcrypt
 Core Logic Service	Node.js, Express.js
 External Integrations	MongoDB, GitHub
 Data Storage Layer	MongoDB

Component Description Table:

Component Name	Description / Role in Architecture
Presentation Layer	Provides a responsive and user-friendly interface for Tenants, Property Owners, and Admin to interact with the system.
API Gateway	Handles HTTP requests, routes RESTful API calls, and enables communication between the frontend and backend services.

Application Services (Authentication & Core Logic)	Manages user authentication, authorization, property management, booking management, search and filtering, and overall business logic.
Database Layer	Stores and manages user accounts, property details, booking records, and application data securely.
