

No. of Functional Features Included in the Solution

Date	30 june 2026
Team ID	XXXXXX
Project Name	HouseRent – House Rental Management System
Maximum Marks	5 Marks

Functional Features Overview:

This document summarizes the functional features implemented in the **HouseRent – House Rental Management System**. Each feature contributes to solving the problem of simplifying property rental management by providing secure, efficient, and user-friendly functionality for tenants, property owners, and administrators.

Functional Features:

S.No	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	User Authentication	Enables users to register and log in securely using JWT-based authentication with encrypted passwords.	Authentication Module	Done	High
2	User Role Management	Provides role-based access control for Administrators, Property Owners, and Tenants with appropriate permissions.	Authorization Module	Done	High
3	Property Listing Management	Allows property owners to create, update, delete, and manage rental property listings.	Property Management Module	Done	High
4	Property Search & Discovery	Allows tenants to search and filter rental properties based on location, price, and property details.	Search Module	Done	High

5	Property Booking Management	Enables tenants to submit booking requests and allows owners to manage booking information.	Booking Module	Done	High
6	Owner Management Dashboard	Provides property owners with a centralized dashboard to manage listings and booking requests.	Owner Dashboard	Done	Medium
7	Administrative Control Panel	Enables administrators to monitor users, properties, and booking activities across the system.	Admin Dashboard	Done	Medium
8	Data Security & Password Protection	Protects user credentials through password hashing using bcrypt.js and secure JWT authentication.	Security Module	Done	Medium

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	Authentication, Role-Based Access, Property Management, Property Search, Booking System
Additional / Nice-to-Have Features	Admin Dashboard, Owner Dashboard, Secure Password Encryption
Features Tested & Verified	8 Features Successfully Tested

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	Login, Registration, Property Pages, Dashboards	Responsive React UI, Property Search
2	Backend / Logic	Authentication, Booking Logic, Property Management	Express.js Routes, Business Logic
3	Database / Storage	User, Property, Booking Data	MongoDB Collections using Mongoose

4	API / Integration	RESTful APIs	Authentication API, Property API, Booking API
5	Security / Authentication	JWT Authentication, Password Encryption	JWT Tokens, bcrypt.js Password Hashing
